## 1.1 Conditional Content in Quarto

```
library(plotly)
library(ggplot2)

p <- ggplot(mtcars, aes(wt, mpg))
p <- p + geom_point(aes(colour = factor(cyl)))

ggplotly(p)
```

## 2

Inline maths:  $f(x)=y$

Inline text:

`\begin{center}`

Example 1: The following paragraph (given in quotes) is an example of centered alignment using the center environment.

“`LaTeX` is a document preparation system and document markup language. `LaTeX` uses the `TeX` typesetting program for formatting its output, and is itself written in the `TeX` macro language.

`LaTeX` is not the name of a particular (executable) typesetting program, but refers to the suite of commands (`TeX` macros) which form the markup conventions used to typeset `LaTeX` documents.”

`\end{center}`

, ““

## 3 Summary

In summary, this book has no content whatsoever.
